

## SELAC 2026- “win-win game changing in global cancer care “ meeting

Dear colleagues, the cancer care professionals and scientists in the world,

“**Changing the Game in global cancer care**” meeting is scheduled for Wednesday April 15, 2026 at (11:00 AM – 12:30 PM Argentina Time ( 5 M-6.30 PM Egypt time ) 3 (3 PM – 4.30 PM London time) .Virtual event Worldwide, Organized by Global Oncology-Implementing Science. Chair and coordinator: Prof. Ahmed Elzawawy). It will be during and a part of “**Latin America Cancer week**”. **Semana Latinoamericana del Cancer SELAC**.

A Combined meeting with the extension of the 4<sup>th</sup> webinar of the second Series of ASCO-GOIS International Webinars. Society of Medical Oncology), E-cancer and London Global Cancer Week

**SELAC** will broadcast the session through its website and those of **RINCSLACOM** ( RINC is The Network of National institutes and institutions) SLACOM is The Latin America Caribbean Society of Medical Oncology), **E-cancer, London Global Cancer Week** and **GOIS, GO-U**

In addition to further information coming from SELAC, We are pleased to invite all to register in GOIS ( for free ) in [www.gois.website](http://www.gois.website) or via your mobile

<https://icedoc.website/cms/login/index.php> . **By registering you’ll receive:**

- 1- Any new news or information coming from SELAC or collaborative partners regarding this event, including a free link to the meeting (“**Changing the Game in global cancer care**” meeting. ( For reminder : It is Scheduled for Wednesday April 15, 2026 at (11:00 AM – 12:30 PM Argentina Time ( 5 M-6.30 PM Egypt time ) , (3 PM – 4.30 PM London time). It is organized by GOIS (Global Oncology-implementing science). It is a Virtual event Worldwide,
2. Recording of the full meeting “**Changing the Game in global cancer care**” within 48 hours after the meeting.
3. PDF copies of most of the lectures.
4. During the meeting and after it, for months, we welcome all your free feedback, suggestions, even constructive criticism, but it should be with references or scientific evidence. Also , Welcome if you like to join , to advocate and to co-lead

To all dear colleagues' cancer care professionals and scientists, all cancer societies, organizations and institutions in the world. It is a plea.

## **“Changing the game in global cancer care has become a necessity, not a choice!**

**Already, we have the science - tens of scientific approaches and ample room for an unlimited number of focused research and studies.**

**What's lacking is multi-leadership and a collective will to collaborate in effective and focused scientific actions.**

If you like to contribute in the scientific progress of this movement and you like to join, then warm welcome. This movement is open to all the cancer care professionals and scientists in the world who like to contribute in the scientific efforts and approaches to make a win-win game changing in global cancer care in order to increase remarkably the affordability of better value cancer in the world through science.

No doubt that the present situation and cancer care systems in the world is not sustainable and the gap in access and affordability is widen despite of the respectable efforts of all the present societies, organizations, institutions, WHO, IAEA , etc., international declarations, summits, big conferences and thousands of publications!

If we continue as we are in the world, there's a risk of collapse of the systems for providing better value cancer care services, with dignity for patients, in rich countries, and surely more grave and catastrophic consequences for less affluent countries. Within a decade or less, the new generation will curse us and ask why we continued without real and serious scientific changes, and not just with talks, big expensive conferences, thousands of nice podcasts, and weak, not really game-changing actions.

We're not replacing or competing with anyone. There's a huge need for everyone, for every institute and scientific cancer society and organization. We're not inventing anything new. There are already tens of published scientific solutions, and a waste of hundreds of billions of dollars. Unfortunately, we ask: why are all these being overlooked or not strongly highlighted? There's wide room for an unlimited number of focused research and studies.

**It is a wake-up call!** It will succeed only with the collaboration of all. All will win. We don't claim any praise or glory. The praise will be for the doers.

There ample room for all , not only for old seniors' clinical oncologists like me – who will leave the theatre sooner or later, but, also for the midcareer and younger generations colleagues in the world.

I am looking forwards to hearing from you and your contribution. **“Be a scientific game changer in global oncology. Welcome to contribute, advocate and to co-lead”**

For feedback and information [feedback@icedoc.website](mailto:feedback@icedoc.website)

Sincerely, Ahmed ( Professor Ahmed Elzawawy. MD clinical Oncologist)

On behalf of all the co-founders co-chairs , co-leaders and all the distinguished faculty and contributors in GOIS, GO-U ( [www.gois.website](http://www.gois.website)) and the win-win international scientific initiative [www.icedoc.org](http://www.icedoc.org) ( see attached )

Last word:

I was inspired by the discussion I had yesterday with Giuseppe Curigliano, ESMO President Elect: "The crazy destruction and killings in the world nowadays make Caligula and Nero seem like beginner's bad and crazy boys in comparison to the madness, killing, wicked cruelty, and senseless destruction we see and hear in the news!"

So, one of the important things we can do is try to serve millions of humans with cancer and lessen their suffering, along with their families, from the physical burden of cancer, including the financial burden and bankruptcy of families, regardless of who they are or where they are in the world, through science and our profession.

Welcome all in the virtual meeting **“Changing the Game in global cancer care”** during SELAC and we are looking to go forward together after the meeting.

( Please don't hesitate do send for inquiry or suggestion to Prof. Ahmed Elzawawy [feedback@icedoc.website](mailto:feedback@icedoc.website) & [worldcooperation@gmail.com](mailto:worldcooperation@gmail.com) )

Deepest thanks to all the staff of SELC

**"Changing the Game in Global Cancer Care" - Agenda**

Wednesday April 15, 2026 at **(11:00 AM – 12:30 PM Argentina Time** ( 5 M-6.30 PM Egypt time ) 3 (3 PM – 4.30 PM London time) .Virtual event Worldwide,

A Combined session with the extension of the 4<sup>th</sup> webinar of the second Series of ASCO-GOIS International Webinars. Society of Medical Oncology), E-cancer and London Global Cancer Week

SELAC will broadcast the session through its website and those of RINCSLACOM ( RINC is The Network of National institutes and institutions) SLACOM is The Latin America Caribbean Society of Medical Oncology), E-cancer and London Global Cancer Week and GOIS, GO-U

Title of the session **"Changing the Game in Global Cancer Care"**

Organizer: Global Oncology-Implementing Science ( GOIS)

Coordinator: Prof. Ahmed Elzawawy

President of SLACOM and co-President of RINC: Prof. Eduardo Cazap.

Date and time Wednesday April 15, 2026:11:00 AM – 12:30 PM Argentina Time (5: 00 pm-6:30 pm Egypt time- 3:00 pm – 4:30 pm London time)

**Diary**

11:00 -11:10 AM Welcome and Introduction, BY E. Cazap (Arg.)

11:10 11:30 AM Why is a game change in global cancer care a must, not a choice? By A. Elzawawy (Egypt) ( On behalf of the co-leaders, The faculty and The contributors in GOIS and “win-win game changing in global cancer care”)

11:30 AM -11 45 AM Optimising dose selection for cancer medicine. By: David Kerr

11:45 AM - 12.00 A Call for Global Collaborative Action to Improve the Affordability of Cancer Care: “win-win game changing in global cancer care” By Ahmed Elzawawy (Egypt) ( On behalf of the co-leaders, the faculty and the contributors in GOIS and “win-win game changing in global cancer care”)

12:00 – 12:10 PM New 1-CURE radiotherapy program to transform cancer care with one low-cost, widely accessible treatment. by Wil Ngwa (USA)

! 2:10- 12: 20 Q&A All

20: 20 - 12: 30 Adjourn E. Cazap (Arg.)

## Changing the Game in Global Cancer Care

*"Changing the game in global cancer care is no longer a choice — it is a must."*

We already have the science. We already have the evidence.  
**What we need now is leadership — and the collective will to act.**

Let us be the generation that turns knowledge into access,  
and equity into reality — for every patient, everywhere.

(Designed by Aya) / Designed by Prof. Cristina Stefan)
